<p style="text-align:center">
  Google is one of the most famous search engines worldwide. It is now very crucial to
  have this type of search engine where we, people,
  are able to find whatever we want virtually or online. Without Google, some of our
  fellow students who are not indeed into actual references
  or resources would have a difficult time to search specific topics. Google has multiple
  information that is easily accessible to many kind of
  individuals. Also, if we are curious about anything like the BIG BANG THEORY, we can
  simply just type it on the search bar and tada! That's it.
